

FIRST RESPONSE™ Bed Bug Containment Kit

Everything You Need To Quickly Stop,
Kill, And Continue Protecting.

When Bed bug outbreaks occur, they can cost hundreds of thousands of dollars in treatment costs, potential lawsuits, lost revenue, and lost reputation.

The First Response Bed Bug Containment Kit was developed to provide an immediate, proactive solution to isolate and treat problem areas before bed bugs can establish themselves and migrate to other sleep quarters.

Each kit includes: 1. ActiveGuard, a chemically enhanced box spring liner that actively kills present and newly introduced bed bugs on contact. 2. An absolute bed bug proof encasement, (also waterproof, virus and bacteria proof). The SlumberShield 360 is the first encasement to have a replaceable top that completely zips off for easy and energy efficient care. 3. Stop Bugging Me Max, an EPA registered, non-staining pesticide to treat all other surfaces including bedding, wood and carpets, drapes and headboards.

First Response Bed Bug Containment Kit					
Product	SKU#	Unit Weight	Case Quantity	Case Size	Case Weight
