

SlumberShield™ 360° Mattress Encasements

Most encasements require two staff members to stand a mattress up on its end, pulling the encasement down or up evenly on both sides to install or remove.

The **SlumberShield 360°** has revolutionized mattress protection by offering the one-of-a-kind, patent-pending **SecureZZip™** around the entire perimeter of the encasement for quick and easy installation, and one person removal and care. Simply unzip the top without having to remove the entire encasement.

Unparalleled in softness and comfort, **SlumberShield 360°** offers advanced **Breathe-A-Barrier™** coating technology to provide a noiseless, ventilated layer of security against bed bugs, dust mites, allergens, molds, bacteria, stains and liquids.
